Hackamania Themes

❖ **Developing India**

Rural India now has superfast internet but the technology advancement still isn't advanced enough. Can you come up with an Idea which can help the rural India get connected to the urban areas and enable then to receive facilities they never had, before until technology came into their lives?

❖ **Red Alert**

No one knows when a completely normal day turns upside down by something we never expected. Whenever it happens first thing that comes to mind is how to get immediate help, be it a lady in a lonely street at night or old parents alone at home, a road accident in middle of nowhere, and the list continues. With the help of technology can you come up with a solution which is effective, prompt and get the best of helps possible

Note: Participants need to choose one of the above themes and create an app or a website within the assigned 15 hr of the hackathon.
